

# ATTENTION

## Glen Ullin Residents

### **Survey Date:** April 24th

Employees from Moore Engineering, Inc. will be in town **April 24** to assist with the water service line inventory. **During this time, you may see Moore Engineering staff going door-to-door in town.** They will be performing visual inspections of water service lines as they enter homes, businesses, and other structures throughout the area.

### **Option 1: Complete the Survey Yourself**

You have the option to complete the survey on your own by visiting [www.ndwaterpipes.com](http://www.ndwaterpipes.com). The online survey takes approximately 5 minutes to complete and, if successfully submitted, will eliminate the need for a Moore Engineering employee to enter your property for documentation.

To complete the survey, you'll need a coin, magnet, and smartphone. The website will guide you step-by-step on how to locate your property's water service pipe.

### **Option 2: Moore Engineering Will Conduct the Survey for You**

If you prefer not to complete the survey online, Moore Engineering employees will visit your residence to conduct the survey on your behalf.

### **Why Is This Survey Important?**

This inventory is part of a nationwide initiative supported by the North Dakota Department of Environmental Quality. They are requesting that residents and property owners submit information regarding the material of their water service pipes. This effort will help the city and other water systems track the presence of lead service pipes and ensure safe water access for everyone.

***Thank you for your cooperation.***
